-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:
 - a. This application lacks the required section headed: Brief Description of the Several Views of the Drawing(s): See MPEP § 608.01(f). A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74.
 - b. Page 2, line 8: the reference to WO 96/23757 is incorrectly cited as "97237757". Applicants should amend the specification to correct this error.Appropriate correction is required.
2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 20-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claims 20, 23 and 24 recite the limitations "[greater than 0 to 5]", "[greater than 2 to 15]" and "[greater than 2 to 5]" in lines 10, 2 and 2, respectively. The lower limit defined by these limitations is unclear. For example, in the case of claim 20 does a ratio of 15:1 one meet the required limitation

since 15 is greater than five? Claims 20, 23 and 24 and dependent claim 21 are therefore rendered indefinite.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 21-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Ditzel et al (US 5,877,348 03-1999). Ditzel discloses (Columns 11 and 12, lines 36-56, Table 5, entries 4,5,8-10) a process for the carbonylation of methanol in the presence of an iridium catalyst, iodide salt and/or source (including alkali and alkaline earth metal iodides) in the presence of an ruthenium promoter present in a ratio of 2/1 with respect to the iridium catalyst. Ditzel additionally discloses (Column 5, lines 37-39) ruthenium promoter to iridium catalyst ratios of greater than 5:1 that encompasses the instantly claimed ranges. Ditzel discloses (Column 6, lines 7-26) the establishment of a recycle stream, which contains iridium catalyst and stabilizer, after distillation of acetic acid and, presumably, carbon monoxide any other non-condensable gases. The stabilizer, as well as other components, is introduced into the reaction by the recycle stream. Ditzel discloses (Column 6, lines 7-26) iodide stabilizer in the range 0.1:1 to 1:1 with respect to iridium. Ditzel therefore anticipates claims 21-40.

Conclusion

5. Claims 20-40 are pending. Claims 20-40 are rejected.
